About the programme

Career refers to a series of jobs available in a particular field. Career prospects give an insight of job openings in your field or area of study. The better knowledge of one's own career helps to determine future needs, ease decision making and choose the plan for better living.

A fascinating science, Botany imparts knowledge on the intriguing world of plants. While giving way to a myriad of courses that take the credit of being more specialized and sophisticated, Botany still is the base on which other biological sciences have grown. Graduates in this basic science fail in navigating to success because of being unaware of the avenues further on. In this context, the Botany fraternity of St. Teresa's College (Autonomous), Ernakulam and Newman College, Thodupuzha have jointly organized the talk that we hope will give necessary guidance and direction to the students.
