MODERN TRENDS IN RESEARCH

OVERVIEW

Research is a creative process which includes insight and continuous search for validating knowledge. It requires imagination and intuition to motivate oneself for the creation of new knowledge.

Teresian Research and Consultancy Cell (TRACC) is committed to achieving excellence in research and scholarship. This annual webinar focuses on the modern trends in inter-disciplinary research and also provides guidance on policies addressing the issues of research integrity, research ethics and good research practice.

This platform dispenses a space for budding researchers to present their research and fine tune them to the need of the society. We aim at promoting initiatives and collaborations by bringing together academicians from other Universities whose work has delivered transformational approaches in trans-disciplinary research.
